PORTABLE GENERATORS

The FIRMAN portable generator range brings customer satisfaction to the forefront with easy handling, safety and excellent build quality.

For general everyday use or for frequent single job use, these generators are the perfect solution. All models offer proven reliability, fuel efficiency, low noise levels and long run times between refueling.

At FIRMAN, delivering a quality generator to customers is of highest priority. Every new model is tested for 500 hours non-stop in a hot/cold room that simulates both freezing cold winter nights and blistering hot summer days. Additional testing in a huge, pressurized room simulates the elevations at which customers might live.
